Fertiplus® Organic compound Fertilizer 12-1-0 is the ideal choice to provide sufficient nitrogen to the crop and to stimulate growth. Nitrogen is the element most required by plants. About 1-5% of the plants dry weight consists of N. Nitrogen is used to form proteins, DNA, chlorophyll, phytohormones and secondary metabolites. Thus, nitrogen is essential for plant growth and functioning. Plants limited in N show stunted growth and eventually chlorosis leading to yield loss. This fertilizer would be applicable before a growth burst in order to ensure plants with adequate nitrogen. Next to the N present in this fertilizer also trace elements are present to ensure the total spectrum for the plants.

This fertilizer contains no potassium. This is ideal for soils high in potassium, of soils where a lot of manure or compost is used with high potassium.

### Benefits

- Provides sufficient nitrogen supply over a long period of time
- Provides a healthy soil life
- Allowed in organic cultivation (B-fertilizer)
- Excellent fertilizer in high potassium soils

### General application advice

- Apply one week prior to planting and mix with the top layer of the soil
- If application before planting is not possible, apply before rain or use irrigation after application
- Trees: distribute the fertilizer within the area above the roots. If possible, mix into the soil
- Spread applications if necessary

### Application & effect

Fertiplus® Organic Compound Fertilizer 12-1-0 is an easy to use Fertilizer with high organic nitrogen content. Due to its high organic matter content, the nitrogen will be released gradually and soil life and health will be stimulated. This Fertilizer is easy to apply in the field: the pellets can be spread over the land using a Fertilizer spreader or by hand. The application of this Fertilizer results in a sufficient nitrogen supply, healthy crop growth and increased yield.

Apples / Pears / plums	2 - 5 kg / tree / year
Olives	2 - 5 kg / tree / year
Citrus	2 - 4 kg / tree / year
Grapes / Vineyard	0,3 - 0,5 kg / tree / year
Pistaches	3 kg / tree / year
Papayas	750 - 1500 kg / year
Mangos	500 - 1250 kg / year
Bananas	1500 - 2000 kg / year

Above figures are an indication. The dosage depends on local soil & weather conditions.

Recommended rates are for full production tree/shrub/plant. For tree/shrub/plant in development stage or without production, rates can be lowered.

Above rates are advised on a complementary based fertilization. In most of the times extra nutrients should be applied depending on soil analysis or crop stage.

## Packaging, transport & storage

TOPMIX® 12-1-0 is supplied in 25 kg bags or 500-1200 kg Big Bags. Must be stored in a dry, frost-free place, away from direct sunlight.  
Shelf life: 3 years minimum.
